

Event Operations Command Platform

Olasentra UX Master Plan

Final architecture for approval before implementation

Version 2.0 · 6 June 2026 · Confidential · No code in this document

Workforce Operations · Event Staffing · Attendance · Messaging · Invoicing

Olasentra — Event Operations Command Platform

Status: Awaiting approval | Replaces: UX Blueprint v1 | Not: CRM · Generic ERP

North star: Transform Olasentra into Ireland's leading Event Operations Command Platform — the system ops managers live in from roster build through event night through invoicing. Think airport ops + SOC + Linear, not Salesforce.

0. Design Philosophy

What we are building

Is	Is not
Real-time ops command for event staffing	CRM for sales pipelines
High-density roster + attendance control	Generic ERP modules
Event-scoped workflows (pre → live → post)	Contact-centric CRM views
Staff workforce portal (PWA)	HRIS / payroll system (Apply stays satellite)
Commission invoicing for clients	Full accounting suite

Visual & interaction DNA

Source	What we take
Linear / Raycast	Keyboard-first, command palette, minimal chrome, fast transitions
Stripe / Vercel	Precise typography, status pills, dense data tables, dark command surfaces
Notion / Attio	Context panels, inline properties, filterable views
Flight Control / Airport Ops	Event timeline, live status boards, amber/red alert hierarchy
Security Operations Center	Multi-panel dashboards, attention queues, operator roles

Ten design mandates

1. **Command, not browse** — Every screen answers "what needs action now?"
2. **Event context is ambient** — Global event selector persists; most views filter to it
3. **Density over decoration** — 11–12px body, 32px row height tables, no wasted whitespace
4. **One inbox** — Messages and alerts are one stream with filters
5. **Event Day Mode** — Full-screen ops layout when live
6. **Palette over menus** — Cmd+K for navigation and actions
7. **Progressive disclosure** — 14 nav items max; depth via hubs and panels
8. **Role-native layouts** — Manager, venue operator, admin see different command centers
9. **Status is colour + icon** — Pending amber, approved green, live pulsing, critical red
10. **Mobile for staff, desktop for ops** — PWA thumb-zone; admin is keyboard + wide screen

- 1. Final navigation hierarchy
- 2. Command Center dashboard
- 3. Activity Center + Unified Inbox
- 4. Event Day Mode
- 5. Event Detail Hub
- 6. Global search + Command palette
- 7. Design system (Olasentra Ops UI)
- 8. Staff management blueprint
- 9. Finance blueprint
- 10. Public website blueprint
- 11. Staff PWA blueprint
- 12. Component library
- 13. Complete screen hierarchy
- 14. Implementation phases
- 15. Approval checklist

1. Final Navigation Hierarchy

14 primary nav items (down from 22). Grouped into 5 command zones. Sidebar stays glass-dark; groups collapse; rail mode at 72px.

COMMAND	
● Command Center	dashboard.php
● Activity & Inbox	inbox.php (NEW)
● Live Ops	live-ops.php (NEW)
WORKFORCE	
● Registration Queue	staff.php
● Staff Directory	staff-directory.php
EVENTS	
● Event Calendar	events.php
● Venues	venues.php
FINANCE	
● Invoicing	invoices.php (hub)
● Exports	export-staff.php
PLATFORM (admin only)	
● Forms & Registration	forms.php
● Website	website-global.php
● Settings	settings-site.php
● System Health	go-live.php (hub)

REMOVED FROM NAV (absorbed):

- notifications.php → Inbox tab "Activity"
- staff-inbox.php → Inbox tab "Messages"
- ops-checklist.php → Command Center panel + System Health
- work-types.php → Event Detail Hub · Config tab
- scan-checkin.php → Live Ops (primary) + Event Hub
- attendance.php, work-hours.php → Event Hub tabs
- job-records.php, personal-invoices.php → Invoicing hub tabs
- blacklist.php → Directory filter + Compliance panel
- users.php, audit-log.php, backups.php → Settings / System Health tabs
- apply-portal.php → Directory · Compliance action + Command Center link

Role visibility matrix

Nav item	Admin	Manager	Staff (venue)
Command Center	Full SOC layout	Full minus Platform	Scan-first minimal
Activity & Inbox	•	•	—
Live Ops	•	•	• default landing
Registration Queue	•	•	—
Staff Directory	•	•	—
Event Calendar	•	•	—
Venues	•	•	—
Invoicing / Exports	•	•	—
Platform (4 items)	•	—	—

2. Command Center Dashboard Blueprint

The true **Operations Command Center** — a SOC-style multi-panel surface replacing the current hero + KPI cards layout.

Layout: 12-column ops grid (desktop ≥1280px)

Panel specifications

Panel	Data	Interaction	Refresh
Status ribbon	Aggregated KPIs for selected event or all	Click segment → filtered view	30s poll / WebSocket future
Attention stack	Prioritized alerts: pending, messages, checklist, PSA	Max 5 cards, severity sorted	On load + push
Event timeline	events + registration counts + live window	Click row → Event Hub	5 min
Roster pulse	Registrations last 24h / 7d	Hover → breakdown by role	15 min
Check-in feed	attendance checked_in_at DESC	Live on event day only	10s on event day

Role variants

Role	Default landing	Primary CTA	Hidden panels
Administrator	Command Center	Contextual from attention stack	None
Manager	Command Center	Review pending OR Live Ops	Platform nav
Staff (venue)	Live Ops	Start scanning	All except Live Ops + ribbon

Event-scoped vs global mode

Header event selector toggles entire dashboard context. **Global** = all events aggregated. **Event-scoped** = single event ops board. Persisted in localStorage + URL `?event_id=`.

3. Activity Center + Unified Inbox Blueprint

Merge `notifications.php` + `staff-inbox.php` into **Activity & Inbox** (`inbox.php`). Two lenses on one data layer.

Information architecture

Activity item types (visual encoding)

Type	Icon	Colour	Source table	Action
registration	person+	blue	app_notifications	view-staff.php
status_change	check/x	green/red	app_notifications	view-staff.php
message	chat	violet	staff_messages	thread panel
event_live	calendar-bolt	amber pulse	app_notifications	Event Hub
checkin	qr	green	app_notifications	attendance.php
psa_alert	shield	amber	external/Apply	apply-portal.php
system	gear	slate	app_notifications	contextual

Badge & header rules

- **Single badge** in sidebar + header = unread messages + unread activity
- Header bell opens Inbox filtered to Activity · unread only
- Mark read on view (3s dwell) or action click
- Email + push remain async channels; Activity Center is source of truth

4. Event Day Mode Blueprint

Full-screen operational mode activated automatically or manually when an event enters its live window (start_time – 2h → end_time + 1h).

Activation triggers

- Auto: event date = today AND within time window
- Manual: "Enter Live Ops" from Command Center or Event Hub
- URL: `live-ops.php?event_id=X`

Layout: Flight-control split screen

LIVE OPS – Nick Cave • 3Arena • 36 approved [Exit] [Fullscreen] 12/36 on-site (33%) Last scan: 14:02:31	
SCANNER PANEL (50%) [Camera viewport] Last: ✓ Jane Doe [Manual check-in] [Sound]	ROSTER BOARD (50%) FILTER: [All Missing On-site Issues] Name Role Status Time Murphy S DSP ● IN 13:58 O'Brien K STW ○ OUT – ... Tapping row → quick actions drawer
TICKER: ✓ Doe 13:58 • ✓ Smith 13:55 • △ Unknown QR 13:52	

Mobile venue operator variant

Scanner full-screen; roster as bottom sheet swipe-up. Haptic + audio on successful scan. Offline queue for scan results (sync when back online — future).

Existing file mapping

New surface	Existing backend
live-ops.php shell	NEW route wrapping scan-checkin + attendance
Scanner	scan-checkin.php + scan-checkin-action.php
Roster board	staff.php?event_id=X&status=approved
Manual check-in	checkin-action.php drawer
Progress bar	attendance count / approved count

5. Event Detail Hub Blueprint

Single event command page — the operational home for one event. Route: `event.php?id=X` (NEW shell over existing pages).

event.php?id=1 – Nick Cave • 10 Jun 2026 • 3Arena				
[Overview][Roster][Attendance][Hours][QR & Sign-in][Sheets][Finance]				
OVERVIEW TAB				
Approved 36	Pending 4	On-site 0	Needed 40	Sheet linked
Status: ● ACTIVE Window: 14:00–23:00 Venue GPS: ✓				
[Enter Live Ops] [Edit event] [Print roster] [Notify staff] [Deactivate]				

Tab → existing page mapping

Tab	Embeds / links	Primary actions
Overview	Stats + timeline + checklist for this event	Activate, edit, live ops
Roster	staff.php?event_id=X	Approve, bulk, export, print

Attendance	attendance.php?event_id=X	Manual check-in, export
Hours	work-hours.php?event_id=X	Adjust hours
QR & Sign-in	print-qr.php, event-sign-qr.php	Print, copy link
Sheets	events-sheets-action UI	Link sheet, sync roster
Finance	job-records + invoice quick for event	Create invoice
Config	work-types, roles_needed (inline)	Save event metadata

6. Global Search + Command Palette

Global search (header bar — extend existing erp-search)

```
Search: "murphy" / "nick cave" / "pending" / "invoice 2024"
Results grouped:
STAFF (3)    → view-staff, directory profile
EVENTS (1)   → event hub
REGISTRATIONS → staff.php filtered
INVOICES     → invoice-form
ACTIONS      → "Approve all pending for Nick Cave"
```

Backend: new `api/admin-search.php` querying staff, staff_registrations, events, commission_invoices. Debounce 200ms. Recent searches in localStorage.

Command palette (⌘K / Ctrl+K — Raycast-style)

```
⌘ Type a command or search...

RECENT
→ Review pending registrations
→ Open Live Ops – Nick Cave

NAVIGATE
→ Command Center
→ Registration Queue
→ Event: Kingfishr

ACTIONS
→ Scan check-in
→ Export attendance CSV
→ Run backup
→ Sync Apply vault
```

Palette command registry (initial 24 commands)

Command	Shortcut	Role
Go to Command Center	G then D	All
Go to Live Ops	G then L	All w/ attendance
Review pending	G then P	Manager+
Open inbox	G then I	Manager+
Search staff...	/	Manager+
Toggle event scope	E	Manager+
Enter Event Day Mode	Shift+L	All w/ attendance
Export staff CSV	—	Manager+
New event	—	Manager+
Ops checklist	—	Manager+

7. Design System — Olasentra Ops UI (OOU)

Design tokens

Token	Value	Usage
--ops-bg-base	#030712	Sidebar, command surfaces
--ops-bg-elevated	#0f172a	Cards on dark
--ops-bg-canvas	#f8fafc / #0b0f19 dark	Main content area
--ops-accent	#8b5cf6	Primary actions, focus ring
--ops-accent-hot	#ec4899	Live event, urgent
--ops-live	#22c55e + pulse	On-site, active event
--ops-warn	#f59e0b	Pending, attention
--ops-critical	#ef4444	Blocked, failed, overdue
--ops-font	Inter, system-ui	All surfaces
--ops-mono	JetBrains Mono	Times, IDs, tokens, KPIs
--ops-text-xs	11px / 1.35	Table cells, metadata
--ops-text-sm	12px	Body dense
--ops-text-base	13px	Body default
--ops-radius	6px cards, 4px inputs	Stripe-like precision
--ops-row-h	32px compact / 40px comfortable	Tables

Typography scale

Level	Size	Weight	Use
Display	24px	600	Command Center greeting
H1	18px	600	Page title
H2	14px	600	Panel title
Label	11px uppercase	500	Column headers, zone labels
KPI	28px mono	600	Status ribbon numbers

Status semantics (SOC palette)

State	Colour	Animation
Live event	Green border + pulse dot	2s pulse
Pending action	Amber left border	None
Critical	Red background tint	None
On-site staff	Green pill	None
Approved roster	Blue pill	None
Inactive event	Slate muted	None

Layout grid

- Sidebar: 260px expanded / 72px rail
- Header: 48px fixed
- Content max-width: none (full bleed for ops tables)
- Panel gap: 8px (tight) / 12px (standard)
- Breakpoints: <768 mobile drawer · 768–1279 compact · ≥1280 command layout

8. Staff Management Blueprint

Two-lens model

Lens	Screen	Unit of work	Primary user
Queue	staff.php	Registration (email × event)	Manager approving shifts
Directory	staff-directory.php	Person (staff record)	Manager maintaining profiles

Registration Queue — dense table view

Filters: [Event ▼] [Status ▼] [Role ▼] [Venue ▼] Bulk: [Approve] [Reject]

☐	Name	Event	Role	Status	Applied	
☐	Murphy, Sarah	Nick Cave	DSP	• PEND	04/06	...

Row ... menu: View · Approve · Message · Edit · Blacklist

Staff profile — split panel (Attio-style)

view-staff.php → two-column
LEFT: Identity, contact, PSA, bank (masked), compliance flags
RIGHT: Registrations for this person, attendance history, message thread

Directory filters (replaces blacklist nav)

- Profile incomplete
- PSA expiring / expired (Apply sync badge)
- Blacklisted
- Never worked
- Active this season

9. Finance Blueprint

Finance is a **post-event workspace**, not daily ops. Single hub with tabs.

```
invoices.php (Finance Hub)
├─ Tab: Commission Invoices    (commission_invoices)
├─ Tab: Job Records            (saved_job_records)
├─ Tab: Personal Invoices      (personal_invoice_lines)
└─ Tab: Export Center          (all export-* linked)
```

Workflow

Event completes → Event Hub · Finance tab → Quick invoice from attendance hours
→ job-record-form (reference) → print-invoice → export-month

Density rules

- Invoice list: 32px rows, inline status (draft/sent/paid/void)
- Right drawer for invoice preview (not full page navigation)
- EUR mono tabular numbers

10. Public Website Blueprint

Marketing site drives trust and registration. **Not** part of command platform — lightweight, fast, CMS-driven.

Zone	Pages	Goal
Discover	home, how-it-works, roles, events	Convert to registration
Trust	faq, contact, privacy	Reduce support load
Act	index.php on register.*	Submit application
Return	staff-app.php	Returning staff entry

Design: Public site uses company theme tokens but **not** ops-dark chrome. Hero + single CTA. Footer always links Staff App.

11. Staff PWA Blueprint

Staff experience = **mobile-first shift companion**. Not a mini admin panel.

Signed-in shell (3 tabs)

```
[ Olasentra                               [Inbox 2] ]
[ HOME | INBOX | ACCOUNT ]
```

HOME:

Next shift hero card (event, date, venue, status chip)
Quick: [My status] [Message coordinator] [Check-in info]
My registrations list (compact)
Company announcement banner

INBOX: unified messages + notifications (same model as admin)

ACCOUNT: profile summary → edit, PSA, sign out

Logged-out: staff-app.php as landing/marketing

Register tile primary. Sign-in collapsed. Install PWA prompt. No fake "check-in" tile — check-in info on status page only.

12. Component Library (OOU Components)

Primitives

Component	Variants	Notes
OpsButton	primary, secondary, ghost, danger, live	32px height default
OpsInput	text, search, select, date	Inline label optional
OpsBadge	status, count, live-pulse	Semantic colours
OpsPill	pending, approved, rejected, on-site	Registration status
OpsKpi	ribbon, card, inline	Mono numerals
OpsAvatar	initials, sm/md	Staff + admin

Composite

Component	Purpose
OpsDataTable	Sortable, filterable, 32px rows, bulk select, sticky header
OpsAttentionCard	Severity border, title, metric, CTA — attention stack
OpsEventCard	Timeline row with counts + live indicator
OpsSplitPanel	Master-detail for inbox, staff profile
OpsCommandPalette	Modal overlay, fuzzy search, keyboard nav

OpsEventSelector	Header dropdown with search + recent
OpsScanner	Camera viewport + result flash + roster sync
OpsStatusRibbon	Horizontal KPI strip, click-to-filter
OpsDrawer	Right slide-over for quick edits, check-in, message
OpsEmptyState	Icon + one line + single CTA
OpsThread	Message bubble list (existing message-thread.php evolve)
OpsActivityItem	Icon + title + body + time + action button
OpsTabBar	Event hub tabs, underline style
OpsFlash	Top toast / banner (admin + staff)

LAYOUTS

Layout	Used by
CommandLayout	Command Center, Live Ops
HubLayout	Event Hub, Finance Hub, Inbox
TableLayout	Queue, Directory, Attendance
StaffShell	PWA tab bar
PublicShell	Marketing + registration

13. Complete Screen Hierarchy

Admin ERP (primary routes only)

AUTH	
login.php · logout.php · index.php	
COMMAND ZONE	
dashboard.php	Command Center
inbox.php (NEW)	Activity & Inbox
live-ops.php (NEW)	Event Day Mode
WORKFORCE ZONE	
staff.php	Registration Queue
staff-directory.php	Staff Directory
view-staff.php	Registration detail (split panel)
staff-edit.php	Edit drawer/page
EVENTS ZONE	
events.php	Event Calendar
event.php (NEW)	Event Detail Hub
event-form.php	Create/edit
venues.php · venue-form.php	
FINANCE ZONE	
invoices.php	Finance Hub (tabs)
export-staff.php	Export center
PLATFORM ZONE (admin)	
forms.php · form-edit.php	
website-global.php	
settings-site.php (+ tabs)	
go-live.php	System Health hub
ACTIONS (never in nav – 35+ POST handlers)	
update-status · bulk-status · save-event · scan-checkin-action · ...	

Staff PWA

staff-app.php (logged-out hub)
staff-home.php (NEW – logged-in default)
staff-inbox.php (NEW unified – or tab route)
staff-account.php (NEW – profile shell)
staff-portal.php · staff-profile.php · status.php
staff-messages.php → absorbed into inbox

Public

home.php · how-it-works.php · roles.php · events.php · faq.php · contact.php · privacy.php
index.php · submit.php · staff-app.php

Apply (satellite — unchanged structure)

apply-portal.php → SSO → payroll · PSA · sync-sheets

14. Implementation Phases (for approval)

Phase	Scope	Deliverables	Risk	
P0	Foundation	Design tokens, component primitives, nav regroup	OOU CSS vars, sidebar restructure, 14-item nav	Low
P1	Command Center	SOC dashboard redesign	Status ribbon, attention stack, event timeline	Low
P2	Unified Inbox	inbox.php + Activity Center	Merge messages + notifications, single badge	Medium
P3	Event Hub	event.php tab shell	8 tabs over existing pages	Medium
P4	Live Ops	live-ops.php Event Day Mode	Scanner + roster board split	Medium
P5	Command Palette	⌘K + api/admin-search.php	24 commands, fuzzy nav	Low
P6	Staff PWA	3-tab shell + staff-home	Home/Inbox/Account	Medium
P7	Finance Hub	Invoice tabs consolidation	Single finance workspace	Low

Deployment principle: Each phase ships independently. No big-bang rewrite. New shells wrap existing PHP pages via embed/include pattern.

15. Approval Checklist

Please confirm before implementation:

1. Platform positioning as Event Operations Command Platform (not CRM/ERP)
2. 14-item navigation structure and removed items absorbed into hubs
3. Command Center SOC layout with status ribbon + attention stack
4. Activity & Inbox unified surface (inbox.php)
5. Event Day Mode (live-ops.php) as default for venue staff role
6. Event Detail Hub (event.php) with 8 tabs
7. Command palette ⌘K + extended global search
8. Olasentra Ops UI design tokens and component library
9. Staff PWA 3-tab shell for signed-in users
10. Phased rollout P0–P7 (no big-bang)
